ncer Information Service

# CLINICAL ANDIETY WITH DEPRESSIVE SYMPTOMS

In a controlled clinical study of 1,168 patients diagnosed as having moderate to severe anxiety, over 70% also exhibited a moderate to severe depressed mood as elicited on the Hamilton Anxiety Rating Scale (HARS).\*

On the Self-Rating Symptom Scale, a large number of patients also reported experiencing such depressive symptoms as low energy, feeling blue and lonely, self-blame, and difficulty making decisions\*

Upjohn

# XANAX RAPIDLY RELIEVES ANXIETY WITH DEPRESSIVE SYMPTOMS.

XANAX, the first triazolobenzodiazepine, is characterized by a structure uniquely different from other benzodiazepines.

In addition to effectively relieving clinical anxiety, XANAX Tablets have been found to be significantly

more effective (p<0.001) than placebo in decreasing depressed mood score (HARS) in patients with clinical anxiety.\*

### A DESIRABLE PROFILE OF CLINICAL ADVANTAGES

- Intermediate half-life of 12 to 15 hours
- Significantly lower incidence of drowsiness when compared directly with diazepam in clinical studies\*
- No greater incidence of anticholinergic effects than with placebo, eg, dry mouth, constipation, tremor†
- No reports of cardiovascular toxicity<sup>†</sup>
- Usual adult dosage 0.5 mg t.i.d.

\*Cohn JB: J Clin Psychiatry 1981; 42(9):347-351. †Data on file, The Upjohn Company.

#### YANAX® Tablets (alprazolam) @

CONTRAINDICATIONS

Patients with sensitivity to this drug or other benzodiazepines and in acute narrow angle glaucoma

WARNINGS

Not of value in psychotic patients. Caution patients against hazardous occupations requiring complete mental alertness and about the simultaneous ingestion of alcohol and other CNS depressant drugs

Benzodiazepines can cause fetal harm in pregnant women. Warn patients of the potential hazard to the fetus. Avoid during the first trimester

PRECAUTIONS

General: The dosage of XANAX Tablets should be reduced or withdrawn gradually, since withdrawal seizures have been reported upon abrupt withdrawal. If XANAX is combined with other psychotropics or anticonvulsant drugs, consider drug potentiation (See Drug Interaction section ) Exercise the usual precautions regarding size of the prescription for depressed or suicidal patients. In elderly and debilitated patients, use the lowest possible dosage. (See Dosage and Administration.) Observe the usual precautions in treating patients with impaired renal or hepatic function.

Information for Patients: Alert patients about: (a) consumption of alcohol and drugs.(b) possible fetal abnormalities.(c) operating machinery or driving.(d) not increasing dose of the drug due to risk of dependence. (e) not stopping the drug abruptly. Laboratory Tests: Not ordinarily required in otherwise healthy patients Drug Interactions: Additive CNS depressant effects with other psychotropics anticonvulsants, antihistamines, ethanol and other CNS depressants. Pharma cokinetic interactions with benzodiazepines have been reported. Drug/Laboratory Test Interactions: No consistent pattern for a specific drug or specific test. Carcinogenesis. Mutagenesis. Impairment of Fertility. No carcinogenic potential or impairment of fertility in rats. Pregnancy: See Warnings. Nonteratogenic Effects. The child born of a mother on benzodiazepines may be at some risk for withdrawal symptoms and neonatal flaccidity. Labor and Delivery: No established use. Nursing Mothe Benzodiazepines are excreted in human milk. Women on XANAX should not nurse. Pediatric Use: Safety and effectiveness in children below the age of 18 have not been established

#### ADVERSE REACTIONS

Side effects are generally observed at the beginning of therapy and usually disappear with continued medication. In the usual patient, the most frequent side effects are likely to be an extension of the pharmacological activity of XANAX, e.g. drowsiness or lightheadedness

Central nervous system: Drowsiness, lightheadedness, depression, headache. confusion, insomnia, nervousness, syncope, dizziness, akathisia, and tiredness/ cleeninece

Gastrointestinal: Dry mouth constipation diarrhea, nausea/vomiting, and increased salivation

Cardiovascular Tachycardia/palpitations and hypotension Sensory: Blurred vision

Musculoskeletal: Rigidity and tremor.

Cutaneous: Dermatitis/allergy

Other side effects: Nasal congestion, weight gain, and weight loss. In addition, the following adverse events have been reported with the use of

anxiolytic benzodiazepines: dystonia. irritability, concentration difficulties, anorexia, loss of coordination, fatigue, sedation, slurred speech, jaundice, musculoskeletal weakness. pruritus, diplopia, dysarthria, changes in libido. menstrual irregularities, incontinence and urinary retention.

Paradoxical reactions such as stimulation, agitation, increased muscle spasticity. sleep disturbances, and hallucinations may occur. Should these occur discontinue During prolonged treatment, periodic blood counts, urinalysis, and blood

chemistry analysis are advisable. Minor EEG changes, of unknown significance, have been observed

#### DRUG ABUSE AND DEPENDENCE

Physical and Psychological Dependence: Withdrawal symptoms have occurred following abrupt discontinuance of benzodiazepines. Withdrawal seizures have occurred upon rapid decrease or abrupt discontinuation of therapy. In all patients, dosage should be gradually tapered under close supervision. Patients with a history of seizures or epilepsy should not be abruptly withdrawn from XANAX. Addiction-prone individuals should be under careful surveillance. Controlled Substance Class: XANAX is a controlled substance and has been assigned to schedule IV

### DOSAGE AND ADMINISTRATION

The usual starting dose is 0.25 to 0.5 mg, t.i.d. Maximum total daily dose is 4 mg. In the elderly or debilitated, the usual starting dose is 0.25 mg, two or three times daily. Reduce dosage gradually when terminating therapy, by no more than one milligram every three days

CAUTION: FEDERAL LAW PROHIBITS DISPENSING WITHOUT PRESCRIPTION

# DISTRICT Communiques

By H. George Grainger, D.O. District III

Tyler's Doctors Memorial Hospital has finally got with it, communication-wise, with the installation of a fancy IBM computer system, hooked conveniently into those Blue Cross and Medicare computers in Dallas. The system almost went into full gear late October, however another gadget, called a DRG grouper, is still to come.

Doctors and others several years under thirty those who speak computorese fluently - will understand when I tell them it is an IBM System 36. Release 2, consisting of a main processing/storage unit with hard disk drive, a printer and three display stations. IBM's HFMS software, they tell us, will be used for General Ledger, Payroll and Accounts Payable, Understand?

There is also a Text Management and Retrieval 36 software thing that's supposed to help the hospital clerical personnel in some way generate reports overlooked by the HFMS software. (Ain't this exciting?)

The hospital people think that with the above hookups, they will eliminate the present ubiquitous hangups, especially in the light of Big Brother's DRG looking down our throats.

The nice thing about it, my informant says, is that after maybe six months to a year, the man hours saved can be utilized to add even more data and programs to the thing. Aren't you thrilled to death?

### In to be

Someone who read that piece I wrote last month on Guatemala has called me pleasantly to task for what I said about there having been no osteopathic physicians allowed to practice there.

Dr. Jack McCorkle, (Kansas City '53), Dallas radiologist was down there himself only recently, doing his bit among the proletariat. Jack says too, if you're a D.O. who's crazy about getting that there M.D. suffix, why you can simply spend a year within its boundaries working in an approved hospital six months, and aix months in the sticks; then, if you ask, you're supposed to be eligible for your Guatemala M.D. degree.

Guatemala, we now know, welcomes us D.O.s.

See Jose

Gorgeous Yuletide to all.

# TOMA Drops Anchor in Corpus Christi

A myriad of exciting events will be yours to sample when TOMA drops anchor at the magnificent Hershey Hotel in Corpus Christi for the 86th Annual Convention and Scientific Seminar, May 3-5.

A city with pronounced South Texas hospitality and charm, Corpus Christi has been called the "Texas Riviera", and not without cause. This city is colorful, diversified, progressive and yet seems to move on a more relaxed keel, a more casual lifestyle, which might be attributed to the calming effects of the warm Gulf waters. Registrants will find a variety of activities intended to appease everyone, from deep sea fishing to swimming, beach combing, sailing and cultural events.

TOMA's port of harbour will be the new Hershey Hotel, one of the city's finest hotels. This is an elegant yet casual hotel with an ambiance to suit every registrant. Each room at the hotel features a bayfront view. Imagine having the opportunity to awake each morning to a view that is truly unsurpassed, that of the rising sun upon the sea.

At the beginning of the year. you will begin receiving registration information, so be sure and watch for it. Don't miss this opportunity to Earn, Learn and Enjoy at Texas' Riviera!

Fees for registration will remain the same as last year and are as follows:

Physician (member) Advance registration At-the-Door Physician (nonmember) Spouse, Military, Intern.

& Associate

Resident, Retired

\$200

\$600

### AMOTA Installation Luncheon

The ATOMA Installation Luncheon is an important event and this year's will be one you won't forget. This function will be held the Wayward Lady. which is one of the most imaginative restaurants around. This ship is designed in the architectural style of the 19th century, is 217 feet long and stands four stories. Her elaborate interior features rich mahogany, lush carpeting and sparkling chandeliers.

After the installation of officers and a sumptuous meal, participants might want to stroll in the clean ocean air and enjoy breathtaking view. This should prove to be an extraordinary event for all involved. Don't miss it!

### Share Your Special Pearls

Do you have a special pearl that you use in your practice? This could be a unique manipulative procedure, or an Rx for a disease, symptom or syndrome or a certain way that you perform an examination.

If you can boast of one of the above and it has proven successful in your practice, write it down and send it in to the State Headquarters in care of Richard Anderson, D.O., 1985 TOMA program chairman

A committee will review and select a favored few and the winners will have the opportunity to explain their favored technique in a 2-5 minute session during the convention lectures. In addition, each participant selected will be awarded a prize.

### Fishing Tournament

Fishing enthusiasts will have the opportunity to make a really big catch this convention. We have chartered the Captain Clark for your sport. The fishing tournament will be held on Friday, May 3. We will leave dock at 5:00 a.m. so you'll be sure and catch the unforgettable sunrise.

The Captain Clark is a 65 foot long boat, is very spacious and is the most luxurious fishing boat on the Gulf Coast. The Captain Clark will take you bay fishing off of Portland and we're sure you will find the fishing the very best.

### American Airlines as Official Carrier

Arrangements have been made with American Airlines to help TOMA's 1985 Convention attendess secure the least expensive and most direct route to Corpus Christi. American is offering a Meeting Saver Fare equal to Super Saver Fare unless deeper discounts are available from your city.

To earn this special discount, you must—reserve through American's Meeting Services Desk, and — purchase your tickets within 10 days after making your reservations, but no later than 14 days before departure.

(Note: There is a \$30 cancellation charge on the Meeting Saver Fare). This special fare is valid for travel with the USA on American Airlines segments only and is available only through the Meeting Services Desk.

Fun on the Beach

The "Good Guys" will be treated to a real good time at the

annual sustainers party in Corpus

Christi. "Fun on the Beach" will

be our goal and with everything

on our side, it looks like we

won't have a hard time accom-

plishing it! Get set for some good

old fashioned fun such as swim-

ming, beach combing and just

plain gazing at the glorious

sunset, all to the light of a bon

The meal is of a certainty to

please all. Who can resist hot

fire, to add to the fun.

STAR File number S-5965 in their computer containing information about the TOMA Convention. It enables American's specialists to better inform you of the most convenient flights. It also permits the creation of an arrival and departure report for our organization on every delegate who reserves through American's Meeting Services Desk.

For complete details, call

American has created a special

For complete details, call American Airlines toll free (or have your travel agent call) Monday through Friday between 8:30 a.m. and 5:00 p.m. your local time: (800) 433-1790, in Texas (800) 792-1160. Advise them that you are attending the Texas Osteopathic Medical Association's Convention and our STAR File number is 8:5965.

### Fun Night Cruise

This will be a night you won't want to miss, as TOMA participants will set sail on Captain Clark's Flagship for a memorable evening. This ship is a luxury 400 passenger paddlewheeler and features an air conditioned main deck, spacious lounge and a beautiful sun deck. The entire ship is 65 feet long. A live band will perform for your dancing and listening enjoyment and for your culinary delight, a seafood buffet will be served. A moonlight cruise is sure to please everyone, however, be sure and bring a sweater for protection against the cool evening breezes. What better way to have a night of fun!

becoming a sustainer, call the TOMA State Headquarters at 1-800-772-5993.

# Auxiliary Statewide

In lieu of the traditional band scheduled during the President's Night Banquet at the convention, the Auxiliary has organized a fund-raising auction to be held during this time slot.

Each district has been asked to involve its members in locating and acquiring items to be auctioned. The objective is for each district to donate at least two items, with a minimum dollar value of \$50. This is being planned as a silent auction, with every member allowed to submit a written bid on any item. Any major donations, such as trips, furs, etc., will be bid on the evening of the President's Banquet.

This is a worthwhile benefit in that the proceeds are funneled into osteopathic student scholarships, loans and the osteopathic progress fund, which supports research grants.

The Auxiliary needs your help. Your participation and cooperation is truly appreciated.

### Golf Tournament

Golfers, get your swings in shape and get ready for the annual TOMA golf tournament. The event will take place at the North Shore Country Club in Portland, which features a world class golf course.

G.W. Beckett, D.O., Larry Taylor, D.O. and Bill Albarado, D.O. will serve as chairmen this year, with the pro being Mr. Von Hagge and traveling pro Mr. Ronnie Black. Watch the Texas DO for registration forms for this event.

### dogs, hamburgers and barbeque chicken and the likes? If you're not a sustainer dready, you still have time to become one and join us for "Fun

on the Beach."

# Ole Doc Mitchell

by Ellen O'Toole

"You're a lucky man, Sam, said oc, two fine young boys and now precious girl. No finer Christmas sent can I think of for you than is moment." Sam laughed and id, "I agree, Doc, but I wish I ould give you a proper Chrstmas resent by paying you right now." oc smiled and replied, "Now. know I'll be needing some ore chickens this winter and bedes, you raise the finest chickens all this territory. Our agreeent still stands. You just take god care of your wife. This birthwas not easy for her like those loys, and she is very weak. That ver last spring took its toll on eryone around here, including our wife. I've got to go now, Sam. lerry Christmas."

Sam stood outside and watched Doc Mitchell disappeared into e dusk. He felt so very blessed at is moment, realizing that his own ife had not only survived the mible fever of last spring, but had resented him with another child. oc Mitchell had not been so formate, for his own wife was lost to be fever. The last sounds of Doc's uggy faded into the night and as am returned to his house he ayed, "Lord, bless Doc Mitchell. there is no finer man in these arts than he, and he looks so tired ad sad since the loss of his wife." Doc spoke to his horse softly, Well, boy, it's just you and me ain and I'm so glad you know the ay. Take it slow, so I can sleep a "The horse ambled ahead and he weary physician thought of the hrist child and the meaning of hristmas. He really didn't feel such this Christmas Eve for it was another day as far as he could

tell. He spoke softly once more, "I really wish there was a reason to feel at peace with myself, just a small sign so I could go on taking care of these people, just as I've always done. I don't ask for much just to know somehow that I am on the right path."

The chill of the night had settled in, but Doc slept soundly wrapped in a heavy blanket. Slowly he became aware of a beautiful soft white light surrounding his being. He inhaled deeply feeling great warmth within his chest. He contito breathe deeply, not wanting to lose this wonderful experience. He became aware of someone holding his left hand, and he knew in an instant that it was his wife, Druscilla, He tried to open his eyes and realized his whole body was unable to move. He had never known such peace at any time in his life and held on, relishing each moment. Slowly, the buggy began to feel empty again and Doc opened his eyes. He put his hands together. The left hand was very warm and the right one was quite cold. He looked up to the starry sky and murmured, "Thank you."

Doc Mitchell was at the outskirts of town now, and as he came closer to the church he could hear the congregation singing his favorite hymn. He stopped the buggy and walked inside the Church. Rev. Michaels smiled broadly, moved quickly to Doc's side and said, God bless you, sir, we've all missed you so much." Doc smiled and shook the minister's hand, but made no reply. He would never reveal his Christmas experience, but he would never forget, for he had seen God within himself and knew the light of the Lord.

### Dr. Boyd Named President-elect

At the annual meeting of the Civil Aviation Medical Association in Monterrey, California on October 24, 1984, John H. Boyd, D.O. was named president-elect. He also participated in the First Global Symposium on Civil Aviation Medicine featuring speakers from 15 countries discussing problems in civil aviation medicine. In addition. Robert Shields, M.D., president of Civil Aviation Medical Association named Dr. Boyd program chairman for the symposium to be held in October 1985 in Guadalarja, Mexico.

A TOMA member since 1955, Dr. Boyd received his D.O. degree from Kirksville College of Osteopathic Medicine in 1955 and has practiced in Louise, Silverton and Eden, where he is presently located. He has held numerous positions including member of the Texas Medical Foundation, Texas Institute for Medical Assessment, TOMA president from 1973-74, member of the TOMA House of Delegates for 18 years, with eight of them as vice speaker and as a member of the AOA House of Delegates. Dr. Boyd is also an aviation medical examiner and is a member of the American Osteopathic Academy of Public Health and Preventive Medicine.

# TOMA President Reports

It was a distinct pleasure to be with District XV members and guests at their legislative dinner on October 4 at Las Colinas. This affair was a true example of what a group of dedicated D.O.s can do to enhance the image of the profession with the people who make the laws under which we practice and which ultimately affect our livelihood. My hat is off to District XV! I would like to challenge other districts to become similarly involved so that even greater things can be accomplished for our profession.

On October 13, Dr. Elva and I were guests of District VII in San Antonio. It was great seeing new faces, some coming from as far away as Killeen to be at this meeting. We also were gratified to greet standard bearers, who have for many years kept the profession united by their very presence. Together, new enthusiasm and interest is sparking District VII.

October closed with a very eventful weekend, beginning with the TCOM Advisory Committee meeting on October 26. The chief topic here was the low scores achieved by a few of the TCOM students on the most recent FLEX exam, resulting in adverse publicity in the Fort Worth Star-Telegram. The TCOM President and his staff presented facts from a thorough analysis of the problems and assured us that some changes have been initiated and others are forthcoming to rectify this problem. From my own analysis, I would like to point out that the highest average grade on the FLEX exam is 83 percent (from Texas A&M) and the lowest is 77 percent from TCOM - only a five-point spread. It was directly admitted by several M.D. sources that the FLEX is derived partially from exams that the allopathic students have already taken in their home schools, so that they have an advantage of 25-50 percent repeat questions. You can easily see that if our students had had that advantage, they could easily have scored much higher. The question is not if FLEX is a good or bad testing procedure, or even if it tracks osteopathic education- which it appears not to do - but instead, the question involves access to preparatory material.

The answers are not yet in, but your board and association are not sitting idle. The program for correcting this injustice is progressing. TOMA and TCOM are committed to excellence in osteopathic education and are diligently striving toward that goal.

Following the advisory meeting, TOMA Archives Committee met, formulating plans to make the TOMA

headquarters a repository for the history of osterpathic medicine in Texas. Your support is solicine any old medical paraphernalia, documents, or other

# Our 287-bed hospital offers the physician:

AN OPPORTUNITY... for professional growth with a growing not-for-profit medical facility with an outstanding need for many physicians in the heart of the Dallas-Fort Worth Metroplex.

SECURITY. . . \$50,000 first year guarantee

PROGRESS. . . 12 bed Metabolic/Diabetic Rehabilitation unit, Cardiac Intermediate Care Unit, Cardiac Cath Lab, Neo-nat ICU.

EXPANSION...30,000 square foot Hospital based Medical Office \$20,000,000 construction program.

A CHALLENGE. . . for continued excellence in intensities and residency programs, as well as a comprehensive continuing medical education program for the 150 osteopathic and allopathic physicians presently on the staff.

A COMMITMENT... for providing the best diagnostic and treatment capabilities available for the citizens of our community; at present offering cobalt treatment. LASER eye surgery, outstanding nuclear medicine department, and many other services not usually found in hospitals of comparable size.

### Dallas/Fort Worth Medical Center - Grand Prairie

2709 Hospital Blvd. Grand Prairie, Texas 75051 (214) 641-5001

Contact Richard D. Nielsen, Administrator

"Ours is a health care facility that will not be content with less than excellence in everything we do."

of historical significance are earnestly sought. lease notify the TOMA office if you can help. More ablicity concerning this effort will follow

Later that day, the TOMA Board hosted the junior ass and their guests to a splendid buffet at the TOMA fice. This peer-to-peer interaction in small groups and us to understand and appreciate one another's oblems and concerns. I was personally impressed th the maturity, commitment, and dedication exessed by our future D.O.s. We will be in good hands hen these men and women take over leadership in or profession.

The TOMA Board works! The executive finance mmittee meeting began at 7:30 a.m. on October 27. lowed by a TOPAC meeting, ending with a meeting the full Board. The intensive agenda of twenty pics included the following: 1) TCOM FLEX scores legislative action, particularly our support of the ational Osteopathic Board for licensure, 3) budget ralysis (We are operating within our budget.), 4) view of insurance programs, 5) membership stratees, 6) reimbursement for OMT, 7) disciplinary action ferred from H & I committees, 8) 1985 pre-convenon report (Corpus Christi will be terriffic in May in to come!), 9) revamped student loan programs, d 10) continuing support of the Texas Medical oundation. The day was long but productive.

As you can see, the issues affecting you are being dressed. Keep your imput coming to your represenrive on the TOMA Board and to me. We are comitted to serving all of you to the best of our abilities. dividually and collectively.

# **Capitol Report**

By Bill Clayton

After months of campaigning, the results are in. The Reagan landslide was greater than expected, and the coat-tail effect contributed to the election of 16 new Republican House members in the Texas Legislature. and one new Republican Senator. It will be a new day in the Texas Legislative halls, however it is my firm belief that the 69th Legislature will be most responsive to TOMA, osteopathic doctors, and the Texas Osteopathic Medical School, With new floor space coming on line, and a full compliment of students in all classes, our need for adequate appropriations will be most critical. This will be difficult to come by in the face of the impending money crunch for state government. but working together as a team we will succeed. As an individual, if you have a newly elected Representative. contact him or her and let them know you support them in the coming Legislative session. This will begin to build goodwill towards our group, and our long term goals will become more attainable.

# TCOM Joins Local Adopt-a-School Program

Texas College of Osteopathic ledicine (TCOM) has "adopted" ort Worth's magnet health prossions high school in the local hool district's adopt-a-school pro-

Professionals at TCOM will work ith students and faculty at the ort Worth Independent School strict's High School of Medical ofessions at North Side High chool in the program that began his fall.

"This is a great opportunity for e college to invest in a school that a tremendous tradition and story in Fort Worth," said Carlos vente, asssistant to the president at TCOM and liaison for the program. "To North Side, this is an obvious boost to a new program. We will be providing ground floor assistance to a program that is unique to Fort Worth and to the State."

Edward Elko, Ph.D., associate dean for basic sciences, is coordinator of the program.

Students selected for the program will enroll in courses of enriched and advanced mathematics, foreign languages and English classes, as well as classes in exploratory medical careers, computer science, health and laboratory science. The program also includes an internship in which students work in a medical/professional facility.

Students must apply for the program and will be accepted on the basis of academic standing, teacher or counselor recommendations and student interest. A standardized test also will be reviewed.

More than 200 different careers are available in the health field, with six million people now employed nationwide. Already one of the largest industries in the state, medical professions are predicted to top the list in Texas by the year 2000. A

# Dr. Willard Resigns as TCOM President

November 12, 1984

Board of Regents Texas College of Osteopathic Medicine Denton, Texas 76203

Ladies and Gentlemen:

I would like to step down as President and Dean of the Texas College of Osteopathic Medicine, effective June 1, 1985, so as to return to full-time teaching and research as a member of the faculty in the Department of Surgery.

In the lifetime of every institution, there comes a time when new directions are appropriate. This also holds true in our professional lives. I wish to thank the Board of Regents of North Texas State University and Chancellor Hurley for having had the opportunity to serve as administrative officer on the TCOM Fort Worth campus. I am proud to have been a part of two great institutions.

North Texas State University is taking its rightful place in Texas higher education. Not only is it growing, but it is articulating a commitment to academic excellence.

Over the past nine years, I have had a part in recruiting one of the finest medical school faculties in the United States. I have been involved in the selection of key department chairmen, assistant deans, and associate deans, and in the appointment of the current

Vice President for Academic Affairs. The past nine years have seen the creation of a unique department of medical humanities under the initial leadership of Charles Ogilvie, D.O.

Dr. Ogilvie and my old teacher, Irwin Korr, Ph.D., led a faculty task force in the development of our goals statement, which was approved by the Board of Regents in 1980. The goals statement is a landmark document. Its sound philosophy has been confirmed and reconfirmed in policy statements of the U.S. Department of Health and Human Services and, in particular, by the outgoing Assistant Secretary for Health, Within the last few weeks, the Association of American Medical Colleges has published its report on "Physicians for the Twenty-First Century." This new report reiterates most of the ideas in our goals statement.

In the past six years, we have developed clinical teaching relationships with the United States Air Force Regional Hospital, Carswell Air Force Base, and William Beaumont Army Medical Center in El Paso, Texas. These have been built on the sound relationships with Fort Worth Osteopathic Medical Center: Northeast Community Hospital, Bedford; Dallas/ Fort Worth Medical Center, Grand Prairie; Stevens Park Osteopathic Hospital, Dallas; and other fine osteopathic teaching hospitals.

An exciting recent development has been the creation of the Center for Osteopathic Research and Education. Despite a 100-year history of teaching medical students, the TCOM Center for Osteopathic Research and Education is unque and promises much, not only for education in colleges of osteopathic medicine, but also it can make a much needed contribution to medical teaching in all colleges of medicine.

The past years have seen the development of the Institute for Human Fitness, which continues to grow and to serve TCOM, NTSU, Fort Worth, and Tarrant Courty and have had an immeasurable impact on the health and effectiveness of several police and fire departments, faculties and staffs of TCOM and NTSU and the public at large.

The State has been generous in its support of new facilities. I am proud of the clinical science building, Medical Education Building I; the basic science and animal care facility, Medical Education Building 2; and the new Library and Learning Resources Center now in the process of construction just north of Medical Education Building 2.

We have enjoyed a partnership relationship with the City of Fort Worth in the Northside Multipurpose Center and the Southside Multipurpose Center. The ambulatory clinics in these two centers are providing needed medical care while serving as an educational base for our senior medical students.

I was pleased to serve as the first o-chairman of the NTSU/TCOM diucational Coordinating Council NTECC). We have only just begun o scratch the surface of the enormous potential for productive elationships between NTSU and COM. There will be a growing joint project in aging. There is a place a series of graduate promams administered by NTSU but mongly supported by TCOM seulty.

Most recently, we have entered sto the Adopt-A-School program ith the Fort Worth Independent school District. We look forward to apporting and nurturing the develpment of the North Side High school, which will serve as a agent school for the entire

listrict.

I look back on the last nine years with a sense of pride. I look forward to the next several years with years of excitement, knowing that is yet to come for the Texas follege of Osteopathic Medicine and knowing what I can contribute a I return to full-time teaching and the practice of general surgery. I look forward to working with ou and the new TCOM administration in the fulfillment of the ICOM goals.

Sincerely.

Medicine

Kalph I Willard

IN MEMORIAM

Arthur W. Johnson, D.O.

Arthur W. Johnson, D.O., of Houston, passed away October 19. Funeral services were held October 23 at Church of the Redeemer, Episcopal with the Rev. Ladd Fields officiating.

Dr. Johnson received his D.O. degree from Kirksville College of Osteopathic Medicine in 1960, interned at Corpus Christi Osteopathic Hospital from 1960-61 and had been an active member of the Texas Osteopathic Medical Association since that time.

He had served in the TOMA House of Delegates for seven years and served as an officer of TOMA District VI.

In 1983 on the occasion of Black History Day observance at the State Capitol, Dr. Johnson received a special citation in ceremonies under the rotunda from Rep. Senfronia Thompson of Houston.

Dr. Johnson was active in the church and served as a medical missionary in Malawi, Africa.

He is survived by his wife, Nan, Houston; his mother, Mrs. Naomi Wright Johnson, Clovis, New Mexico; daughters, Mrs. Dorothea Johnson Fleischer, Channelview; Mrs. Ralph W. Bradford, D.O.

Ralph W. Bradford, D.O., 63, of Buna passed away at his home on October 1. Funeral Services were held Wednesday at First Baptist Church with burial in Antioch Cemetery under the direction of Causey's E. E. Stringer Funeral Home.

Dr. Bradford had been a longtime member of TOMA and had practiced in Buna since 1957. He was a Texas member of the American Osteopathic Academy of Public Health and Preventative Medicine.

He was honored in June at his 40th class reunion at Kirksville College of Osteopathic Medicine from which he graduated in 1944.

Dr. Bradford is survived by his wife, Rosa Carter Bradford; three sons, Bill of Houston, Larry and Blair, both of Beaumont, and one grandchild.

Rebecca Jayne Johnson Gray, Cypress; Miss Estajean Rosemarie Johnson, Houston, fosterdaughter Mrs. Tina Richter, Houston; son, William Elliott Johnson, Houston; and three grandchildren.

### Physician's Guide to Professional and Personal Advisors

The least trustworthy advisers that physicians have are insurance agents, according to a poll of physicians and physician's advisers. The most trustworthy are accountants and practicemanagement consultants.

Other advisers with low integrity: funeral directors. Others with high integrity: lawyers, interior designers, financial planners, and bankers. Those with average-to-high integrity: architects and investment advisers.

The poll was conducted among 27 physicians and advisers whose clients are mainly physicians. The findings appear in a new book, Physicians' Guide to Professional and Personal Advisers, by Warren Boroson, just published by Medical Economics Books.

In the poll, integrity was defined as an adviser's readiness to put the client's interest above his or her own. According to author Boroson, members of any occupation are likely to be trustworthy if most of them (1) need not cut ethical corners to make a decent living, (2) are paid by fees, not by commissions, which might tempt them to overemphasize sales; and (3) have inherited a tradition of high ethical standards.

Physicians' Guide to Professional and Personal Advisers is available for \$16.95 (plus \$1.50 for handling) from Medical

Economics Books, Box C-779, Pratt Station, Brooklyn, New York 11205. Prices are subject to change after January 1, 1985.

### Radioactive Contaminated Gold Rings May Cause Skin Cancer

Without realizing it, some people have been wearing radioactive gold rings for years causing a few to develop skin cancer. So says a report in the June issue of the Journal of the American Academy of Dermatology.

At least 14 cases of cancer of the ring finger have been indentified among persons who have worn contaminated rings, reported Charles D. Stutzman, M.D., from the Centers for Disease Control in Atlanta. The low levels of radioactivity found in the rings are believed to be from gold that was originally used to encapsulate radioactive radon gas, a technique developed in the 1920s to treat tumors. Most of the rings were purchased between 1921 and 1940 from iewelers in western New York

Radioactive contamination of gold rings does not appear to be widespread public health hazard. However, many undetected cases probably exist. The Centers for Disease Control and the Food and Drug Administration are asking that physicians report skin cancer or hard to treat dermatosis of the ring finger to Gail Schmidt, FDA/ NCDRH, 5600 Fishers Lane. Bethesda, Maryland 20857. (301) 443-2850.

### "Baby Doe"; Key Health Bill

President Reagan has signed into law a key health bill, the controversial "Baby Doe" bill This legislation requires states to create offices to monitor and regulate cases involving the withholding of medical treatment from handicapped newhorns.

The "Baby Doe" saga began in 1982 in Bloomington, Indiana when a severely handicapped infant, at his parent's order, was not fed and extensive surgery to correct a digestive defect was not performed. Subsequently, the infant died six days after birth.

However, with the birth of the new legislation, such action would only be allowed in cases where the infant is irretrievably comatose, or would not survive without treatment, as based on the physician's "reasonable medical judgement".

### Aids Alert

As reported in the August 30 England Journal of Medicine, a rare cancer known as non-Hodgkin's lymphoma, which attacks the central nervous system, abdomen and bone marrow has now been added to the list of opportunistic infections found in those with acquired immune deficiency syndrom (AIDS).

A government spokesman says AIDS victims are eligible for federal Social Security disability benefits, and he characterizes the current approval rates for claims A CONTRACTOR OF THE PROPERTY O Hospitals Complain that
Wage Indexes Benefit
Urban Facilities Over

895 percent.
Rural Ones

Ancient Hindu Folk Remedy has Piqued Interest of Modern Scientists

As of this writing, two kinds of disability programs are available through the Social Security dministration. If a person opts of the plan paid for by Social security taxes, the monthly enefits can be as much as \$850, that person has been regularly phoyed with high earnings. The plans vary in each state.

The wage indexes, hospitals are complaining, benefit urban facilities over rural ones and also do not take into consideration part-time hours. With this in mind, House members from Missouri, Nebraska, Iowa, Kansas, South Dakota, and Minnesota have written to the HHS Secretary Margaret Heckler asking her to issue new indexes.

The new indexes were due to be released before October 1; however, they were not when only 78 percent of the hospitals returned the wage index survey forms.

In response to pressure from 23 members of the House, Secretary Heckler now has promised to issue new wage indexes for Medicare's prospective payment system (PPS) by the end of the year if 95 percent of hospitals participating in Medicare completed the survey and returned them by November 15.

Heckler plans to send each of the Congressmen a list of the hospitals in their districts that have not sumitted survey forms.

An ancient Hindu folk remedy has piqued the interest of modern scientists, according to a report in *The NIH Record*. Ancient texts describe the use of a species of coleus plant as a remedy for such varied ailments as heart disease, stomachaches, respiratory disorders, and insomnia. The particular species, *Coleus forskohlii*, is still used in Indian folk medicine today.

Extracts from the roots of the plant were found to have marked effects as a cardiac stimulant and as a muscle relaxant. The active principle was isolated by chemists at Hoechst Pharmaceuticals Ltd., Bombay. Its structure was determined and the name for skolin was given to it.

Initial research has shown that forskolin stimulates adenylate cyclase in a direct manner, unlike other stimulators of the enzyme's action. Researchers hope that forskolin will prove to be an invaluable research tool as well as a multifaceted therapeutic agent.

# Participating Applications Overlap

According to Health Care mancing Administration offials, many of the participating oplications for the Medicare fee eeze overlap due to the fact at many physicians practice in weral states and thus were sent weral applications. Another maderation is that some oplications cover group pracves or clinics

As a reminder, those who mee to become participating hysicians are accepting Mediure assignment for all cases and arging the beneficiary on the applicable coinsurance and deutible amounts. They will also able to increase their fees the freeze expires on atober 1, 1985.

HCFA is reviewing the 75,000 oplications received thus far, and hope to have the grand total of participating physicians available January 1985.

### DIAGNOSTIC RADIOLOGY RESIDENCY AVAILABLE

Fort Worth Osteopathic Medical Center, a 200-bed facility (expanding to 265 by spring of 1986), affiliated with Texas College of Osteopathic Medicine, has an opening for a first-year diagnostic radiology resident.

Large, active Department of Medical Imaging with five radiologists, second-year radiology resident and large professional staff of specialists and sub-specialists. Residency program includes all areas of medical imaging, including magnetic resonance.

Please contact: Director of Medical Education, Fort Worth Osteopathic Medical Center, 1000 Montgomery Street, Fort Worth, Texas 76107: phone: 817/735-3121.

### Media Won't, So Mobil Brings You the Good News

With thousands of newspapers and magazines network and cable TV news, and radio bulletins all day long, Americans are without doubt the most informed people in the world.

Whether they are the best informed is another question. One reason for this is that good news isn't news. It doesn't make our flesh creep like a good disaster does. Its entertainment value is minimal. And no reporter ever made his reputation by reporting good news, anyway.

But this lack of balance in the news can undermine our confidence in our country's future. So, in a small effort to even the score, here's a selection of good news we think should be more prominently reported. The figures come from Statistical Abstract of the US: 1984, put out by the Census Bureau:

Americans are getting healthier. A baby born in 1982 can expect to live to age 75, compared with age 70 for one born in 1960.

The roads are getting safer. Deaths per 100-Million motor vehicle miles were down to 2.8 in 1982 compared with 5.3 in 1965.

Education is improving. Over 12-Million students were in college in the fall of 1982, compared with 7.3-Million in 1970. Of people over 25 years of age, over 70 percent were high school grads in 1982, compared with 41 percent in 1960.

We could go on. But we've made our point. For the world's problems, see the TV and newspaper headlines. For the good news, you have to dig a little deeper. But it's there, and it's just as real. Have a good day!

Mobil Corp. paid editorial in major papers and news magazines, Sept. '84

### AOBGP Release Requirements for Board Certification

Candidate must submit completed application and documentation that he/she has been in practice six years and has at least 600 acceptable CME hours or has completed a one year AOA-approved residency in general practice. The examination fee, a recent snapshotsize photo and a letter of intent must also be submitted. The candidate has three years to complete the examination that is given six times during those three years. A candidate is not board eligible until he/she receives notification from the AOBGP office that his/her application is complete.

A letter of board eligibility may be sent to candidates who have not been in practice six years and have not obtained 600 acceptable CME hours but have graduated from an accredited college of osteopathic medicine and have completed an AOA-approved internship program. A \$25 annual fee will be required for secretarial services until such time as he/she has documented the required CME hours, six years in practice and applies for the examination.

All correspondence should be sent to:

American Osteopathic Board of General Practice 2474 Dempster Street, Suite 217 Des Plaines, Illinois 60616 ^

# Osteopathic Physicians Accept Fellowships

Two medical staff members of Fort Worth Osteopathic Medical Center, Stanley R. Briney, D.O., and Robert G. Garmon, D.O., have been accepted as fellows into national colleges of medicine.

Dr. Briney was accepted as a fellow into the American Osteo-pathic College of Radiology during its annual clinical assembly in New Orleans in October. Brney has been a member of the OMC medical staff since 1974 and is the chairman of the radiology department.

A graduate of Kirksville College of Osteopathic Medicine, Kirksville, Missouri, Briney intermed at Lansing General Hospital in Lansing, Michigan and later completed his radiology residency at Grandview Hospital in Dayton, Ohio.

Dr. Garmon was accepted as a fellow into the American College of Chest Physicians at a conference held in Dallas in October. Garmon has been an OMC medical staff member since 1978.

After receiving his medical education from Kirksville College of Osteopathic Medicine, Garmon served an internship at Normandy Hospital in St. Louis, Missouri. He completed an internal medicine residency at OMC.

Both physicians hold membership in the Texas Osteopathic Medical Association and the American Osteopathic Association.

# Rainey Receives Award of Merit

# Wintercrest Charity Ball for 1985

Claude G. Rainey, president of itealth Care of Texas Inc., parent corporation of Fort Worth Osteopathic Medical Center, was honored scently with the 1984 Award of Merit from the American Osteopathic Hospital Association.

The award, which was presented the AOHA's annual convention

a Monterey, California, cited Rainey for his outstanding contriutions to the association and for eadership in his profession.

Rainey has served as executive to the procession. Rainey has served as executive to president of Fort Worth Osteo-wathic Medical Center since 1974 and assumed the additional resonsibilities of president of the welly formed Health Care of lexas Inc. in September.

The District II Auxiliary to the Texas Osteopathic Medical Association presents their annual Wintercrest Charity Ball benefiting osteopathic scholarships and the Gill Children's Services. It will be held on Saturday, February 23, 1985 in the Crystal Ballroom, at the Hyatt Regency Fort Worth, from 8:00 p.m. until 1:00 a.m. The cost will be \$100 per couple.

This year the ball is entitled "College Reunion" which will feature the music from the "Big Band Era" up to Rock 'N Roll. There will also be a gournet feast featuring foods across the nation.

Chairman of the ball this year is Mrs. David Stone.

We will be raffling off many lovely gifts including a trip. The

ball is open to the public and anyone interested in obtaining tickets may call 735-2564 for further information.

We would appreciate your consideration and support of the "Wintercrest Charity Ball" and "Gill Children's Services,"

The Gill Children's Services is an agency concerned with and dedicated to helping needy children of Tarrant County. Emphasis is given to the purchase of dental and critical orthodontic services, medical equipment, and outpatient medical care. The agency also buys professional services from established programs which provide services for those children with other specific needs. A

### NORWICH EATON AUDIO-VISUAL DIRECTORY ADDS 18 NEW PRESENTATIONS

The new 125-page directory of audiovisual presentations available from Norwich Eaton Pharmaceuticals includes 18 new presentations added to the company's library during the past two years. With these additions, 237 different presentations are now available on a free-loan basis and for purchase.

The 18 new presentations focus on specific aspects of urology, enteral feeding, Paget's disease, heterotopic

ossification, general surgery, and allergy.

Copies of the 1984-85 Norwich Eaton Directory of Audio-Visual Presentations are available, at no charge, from Norwich Eaton representatives or by writing to Norwich Eaton Audio-Visual Library, 17 Eaton Avenue, Norwich, New York 13815.

### TCOM STUDENT RECEIVES McCAUGHAN AWARD

S/D Michael E. Davis a second-year student at Texas College of Osteopathic Medicine, has been named recipient of a \$400 R.C. McCaughan Scholarship by the National Osteopathic Foundation.

The scholarships are given each year to one student at each of the 15 osteopathic medical schools in the nation. They are awarded on the basis of outstanding capabilities and strong motivation in osteopathic philosophy exhibited during the first year of medical school.

### NATIONS HOSPITALS SUCCUMB

According to the Health Care Financing Administration, some 74 percent of all hospitals are now under Medicare's prospective payment system. The group of hospitals that joined PPS on July 1 was the largest since the system began.

### ORPHAN DRUGS

Under legislation approved by Congress recently, diseases affecting fewer than 200,000 people in the United States will now be classified as "orphan diseases". Because of the fact there was no clear definition for orphan disease earlier, tax breaks authorized by Congress in late 1982 were not implemented

by the Treasury Department.

This legislation will also put to rest a debate within the Reagan Administration over tax breaks to drug companies that develop orphan drugs.

### AACOM AWARDED GRANT

The American Association of Colleges of Osteopathic Medicine (AACOM) has been awarded a grant for a gerontological training project by the Office of Human Development Services, U.S. Department of Health and Human Services. The technical aspects of the project will be conducted by the Ohio University College of Osteopathic Medicine.

The goal is to provide osteopathic colleges with materials, strategies, and resources by which osteopathically oriented content dealing with the care of the older individual can be incorporated into the undergraduate medical curriculum.

### ANDERSON ASSUMES DIRECTOR OF CORPORATE FINANCE DUTIES

Robert D. Anderson has been named director of corporate finance for Health Care of Texas Inc., the parent corporation of Fort Worth Osteopathic Hospital Inc. The announcement was made by Claude G. Rainey, president of Health Care of Texas Inc. and executive vice president of Fort Worth Osteopathic Hospital Inc.

Anderson will be responsible for the management of all financial and accounting activities of the corporation.

A native of Fitzgerald, Georgia, Anderson completed his studies in accounting at Massey College in Atlanta and became a certified public accountant in 1969.

### FIRE-SAFE CIGARETTES

A bill passed by both the House and Senate and signed by President Reagan approved a study on the feasibility of developing a safe cigarette, or one that would not ignite such materials as mattresses or furniture.

According to the National Fire Protection Association, cigarettes caused 35 percent of all home

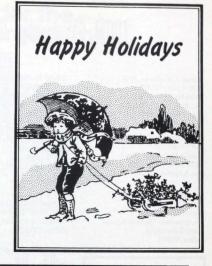

fires resulting in death.

The bill requires an interim report within one year and a final report within 2 1/2 years and will examine il of the consequences of such a cigarette. Congress will then decide at that time whether the government hould recommend the development of a fire-safe igarette.

### MEDICARE MEMBERS ON THE RISE

More than 30 million beneficiaries of Medicare will he forced to up the ante by paying a \$400 deductible ach time they are hospitalized next year. The old deductible of \$356 will be phased out January 1. Premiums paid for Part B coverage (physicians services) will rise from \$14.60 per month to \$15.50 er month.

There are about 30.5 million people covered by the Medicare program today. In 1985, the number is expected to leap to approximately 31 million. To that effect, Medicare spending is expected to increase from \$63.1 billion in fiscal 1984 to \$73.3 billion in fiscal 1985.

# Alcoholism could be fatal. We can help you help your patients.

The complications and consequences of alcohol addiction are numerous and often tragic. Schick Shadel's proven treatment program can help you help your patients quit drinking before it's too late. Unlike other programs that rely almost entirely on psychiatric counseling, ours is based on the scientific concept of "Aversion Therapy," and effectively combines medicine and psychology in just 10 days of counter-conditioning treatments. Also, our treatment plans are covered by most insurance plans, including Medicare.

Since 1935 we've helped more than 35,000 people guit drinking and lead happier lives.

We can help you help your patients, too. For more information, contact Chief of Medical Staff, Dr. Eck G. Prud'homme, Jr., M.D.

# offers effectiveness against the major causes of bacterial bronchitis

H. influenzae, H. influenzae, S. pneumoniae, S. pyogenes (ampleillin-susceptible)

# Change is Fine - - - For Others

Despite efforts to slow rising medical costs, the federal government has made the following predictions: the cost of health care will increase by \$50 billion a year going from \$332 billion in 1982 to \$1.9 trillion by 1999. Despite these awesome figures, a report compiled by the Robert Wood Johnson Foundation and published in the New England Journal of Medicine believes this doubling of health care costs every six years is due to the fact that people only want changes that don't affect their own health care.

Fifteen national public opinion surveys were summarized and a surprising degree of agreement was found among the respondents. The four conclusions that were reached are as follows:

1. Public and elected officials see rising costs as the number one problem in health care. However, neither ranks the issue as very high on a list of the most important problems facing the nation.

2. Americans are deeply disturbed by the sharply A rising prices of their health care, particularly thed increasing costs of visits to the doctor or stays in thele hospital. However, most are not troubled by theil growing share of the nation's economy that is devoted to health care. Most believe that society currently spends too little rather than too much for such services n

3. Although most Americans believe the country's present health-care system is inefficient, they aren generally satisfied with their own health care.

4. Three out of four people believe doctors bear as major responsibility for the nation's rising healthcare costs, and two out of three people say they area beginning to lose faith in doctors. But in general doctors maintain a unique credibility with the publices

Law of the Osteopathic Stan Briney, Drs. and Mrs. Captallary on the Osteopathic Stan Briney, Drs. and Mrs. Stan Briney Drs. and Mrs. David sever.

At its annual meeting there, he Auxiliary to the American follege of Osteopathic Surgeons lected our Carolyn Bilyea as its resident for the coming year. ongratulations, Carolyn!

Also at this meeting, Stan Briney as made a Fellow of the American beteopathic College of Radiology, ie was given a big surprise when sife, Priscilla, had — unknown to im — made arrangements for his hildren and his parents to be here and be present for this signal bonor. Congratulations, Stan!

### समयस

As a charitable service, our Distict II Auxiliary has "made up" ygiene kits which will be available or gifting to indigent patients who hospitalized. Patient Represenative Judy Beyer will be doing he dispensing of these necessary supplies".

### सससस

A new service being provided ourtesy of the Fort Worth Osteo-athic Medical Center is a hospi-ality cart manned by the Guild olunteers which is stocked with range juice and coffee and is wailable in all the waiting rooms a the first and second floors. These the shown that was the stress when the same provided in the same provided was a stress when the same provided was a stress when the same provided was a same provided with the same provided with the

comed and have received many positive comments.

### सससस

During the September 6-9 meeting of the International Congress on Osteopathic Medicine held in Brussels, Belgium, our Dr. Catherine Carlton served as chairwoman of a Manipulative Medicine workshop and demonstrated treatment techniques for painful thoracic and lumbo-sacral areas.

### समसस

I have glad news and sad news. The beginning of a life when Matthew Frederick Brenner was born on October 4 to Chris and John Brenner. Our congratulations to the Brenner family. The ending of a life on October 27 with the death of Jane Ann Ellis Meals. Jane Ann was the daughter of Virginia and Noel Ellis. Our sincere sympathy to all the family of Jane Ann

### HHHH

Everyone should have received the letter from Nancy Hawa about the Holiday Card Project. This is such a good way of sending greetings to so many with so little effort on our part.

### मयस

Pat Mazeika tells me the Holiday Party will be held on December 12 at the Petroleum Club. We will don our holiday attire and come to eat a delicious dinner and then to dance away some of the calories we have just eaten and have a really good time with our District II friends.

### Ten Years Ago in the "Texas DO"

The TCOM library was selected for MEDLARS Center (Medical Literature Analysis and Retrieval System). This was a bibliographic retrieval system which provided immediate searching of over 400,000 journal articles from over 3,000 bio-medical journals of worldwide scope.

An end to discrimination based on academic degree for the D.O.s in California came about with S.B. 2283.

Dr. Charles Ogilvie of Ben Wheeler was named a Fellow of the American College of Osteopathic Surgeons

New England began work to establish an osteopathic college. And in the same vein, a campus site was chosen for Oklahoma College of Osteopathic Medicine and Surgery.

Dr. Wilfred G. Millington was elected to serve as president of the National Association of Boards of Examiners for Nursing Home Administrators.
