Clinical Osteopathy

By Dr. Louisa Burns

Revised by Dr. C. P. McConnell and a large corps of editors

Summary of Contents

Diseases of the nervous system: General discussion with reference to bony lesions in etiology and treatment.

Functional nervous disorders: The neurasthenic states; hysteria; habits and occupation neuroses; chorea; paralysis agitans; epilepsy; migraine; Raynaud's disease; angio-neurotic edema.

Diseases of the peripheral, spinal and cranial nerves: neuritis, neuralgia.

Diseases of the spinal cord: Locomotor ataxia, infantile paralysis, syringo-myelia; myelitis; meningitis; muscular dystrophies and atrophies; the ataxias.

Diseases of the brain: Tumors, circulatory cerebral diseases; cerebral inflammations; paralytic dementia; the aphasias.

Diseases of the ductless glands: Addison's disease; status lymphaticus; exophthalmic and simple goiters; cretinism, myxedema; acromegaly; osteitis deformans.

Diseases of circulation: Cardiac inflammations; valvular lesions; cardiac neuroses; angina pectoris; arterio-sclerosis and aneurysm.

Diseases of the respiratory system: The pneumonias; emphysema; bronchitis and related diseases, hay fever, diseases of the nasal membranes; pleurisy.

Diseases of digestion: Stomatitis and other oral disorders; tonsillitis; pharyngeal diseases; adenoids, diseases of the esophagus; gastric neuroses; ulcers, cancer; pyloric stenosis; constipation and diarrhoea; appendicitis.

Diseases of the liver: Jaundice; yellow atrophy; cirrhosis; abscess; neoplasms; diseases of the gall bladder and ducts; cholelithiasis.

Diseases of the pancreas and peritoneum.

Diseases of the blood: Chlorosis, pernicious anemia, costogenic anemia; blastomycotic anemia; the leukemias.

General diseases: Diabetes mellitus and insipidus; obesity; pellagra; rickets; scurvy; malnutrition.

Bacterial and parasitic diseases: Tuberculosis; leprosy; influenza; pyogenic infections; typhoid fever; measles, scarlet fever, diphtheria, mumps, smallpox; and other infectious diseases; amoebic dysentery; helminthic invasions.

The text of this volume will be reviewed by a number of the best men in the profession, including representatives of all the colleges.

The method is to emphasize chiefly diagnosis and treatment.

Basic Principles

VOLUME I

DR. LOUISA BURNS

This volume includes the experimental demonstration of the osteopathic centers and early proof of the place of bony lesions in causing disease

Summary of Contents

Relations of normal structure, function, environment and habit; relations of abnormal structure, function, environment and habit; relations of abnormal structure to parasites and infections.

Experimental demonstrations of the osteopathic centers and of bony lesions as a cause of disease; centers governing cranial structures, arms, lungs, heart, abdominal and pelvic viscera.

The Nerve Centers

DR. LOUISA BURNS

A study of the physiology of the nerve centers, with especial reference to the causes of malfunction and the place of bony lesions as disturbing factors.

SUMMARY OF CONTENTS

The structure, physiology, and relations of neurons. — The relations of sensory, motor and association nerve impulses. — The spinal centers, with especial reference to bony lesions affecting their activities. — The medullary, cerebellar, pontine, ganglionic and cortical centers, with reference to causes of disturbed functions. — The nervous control of the heart, blood pressure, blood, and body weight. — Table of Osteopathic Centers. The Blood

By Dr. Louisa Burns

This volume includes the results of several years of research, and covers the entire subject in a most comprehensive way.

Summary of Contents

The Physiology of the Blood—The development of the blood cells. Physical changes in the blood in health and disease. The hemoglobin.

The Morphology of the Blood—The normal erythrocytes. The erythrocytes in disease. Normal leucocytes. The leuco-

cytes in disease. Blood plates and hemoconien.

The Primary Anemias—Costogenic anemia. Blastomycotic anemia. The secondary anemias.

The Leukemias—The organisms found in the blood. The blood serum. Technique of blood examinations.
