Introduction

The 2006 Bibliography of Publications cites journal articles, books, book chapters, editorial letters, and book reviews, both print and electronic, published by 216 authors under the auspices of the University of North Texas Health Science Center at Fort Worth during the calendar year. We have also included 1 citation from 2005 which was not discovered in time to be included last year. The accuracy of references has been verified. This 2006 bibliography, containing 284 unique citations, provides a comprehensive listing of the publications of faculty, staff, and students, and an overview of their accomplishments and research interests.

Entries are grouped by school, then by department, and arranged alphabetically by author within each department. There are separate sections for students of the Texas College of Osteopathic Medicine, the Graduate School of Biomedical Sciences, and the School of Public Health. For collaborative works, the entry is cited under each author. The format used to cite publications follows the style established by the National Library of Medicine.

The bibliography is also available in electronic format on the Gibson D. Lewis Health Science Library's web site: <http://library.hsc.unt.edu/>.
